

BB TALKIN

Action Sports Bluetooth Intercom

BbTALKIN is a game changing Wireless Bluetooth Communication system. Just think, a waterproof walkie talkie platform for professionals, wireless communication for athletes, students and coaches worldwide.

This technology enhances the learning curve two-fold in both water & winter sports.

It is a real time coaching tool allowing the coach to instantly train & provide feedback to the student – it also allows the student to communicate, so if they're not clear on something they can ask for clarification immediately. The channel is open both ways.

Coaches – you no longer have to yell, from the shoreline, jet ski or boat and with the communication distance being up to a mile (1600m) you can only imagine how useful the BBT can be. True waterproof Bluetooth communication!

Recreational groups can talk with one another clearly raising the safety and awareness of the group. The products are wind proof and noise cancelling.

If you are a business owner with a rental company, resort, cable park or watersports facility, this is a must-have!

The BbTALKIN *Advance Main Unit* can be teamed up with a variety of headwear, headsets speakers and mics to suit the activity and conditions.
