

INTENSE by INSIDERS

Pro-grade sports performance and safety live-tracking wearables

Insiders is a Swiss sports technology company specializing in high-precision sports data devices that enhance athlete performance, ensure safety, elevate competition, and revolutionize storytelling.

Our wearable device, **INTENSE**, reimagines data collection and distribution. It transmits real-time performance metrics directly from the athlete to the cloud via 4G—no more post-session synchronization, no middle applications, no antennas, and no manual uploads. Athletes and staff can stay focused on what truly matters—we handle the rest.

Insiders powers major event broadcasters and second-screen content publishers with real-time, in-depth data, delivering richer insights, safety and amplifying the drama of live competition.

Our **plug-and-play Insiders API** seamlessly integrates with your platform of choice. Leading live-tracking platforms, including **Georacing, Racemap, Rawmotion, WeAreSweet, and Velon**, have already incorporated the **INTENSE** data feed.
