

ATLAS 2

High Quality Sailing Instrument

vakaros

SEE THE FUTURE. SAIL THE FUTURE

We set out to create an instrument that would improve the on-water experience for sailors ranging from hardcore racers to casual daysailers. The Atlas 2 is a highly precise GPS instrument, touting L1+L5 dual-band GPS. Alone, the Atlas 2 is a huge step forward in small boat instruments.

Atlas 2 also supports wireless links to select wind and water sensors, allowing a lightweight, wire-free experience for daysailers, or a backup instrument on keelboats. All of this data is displayed on a vibrant screen, both day and night.

The Atlas 2 has over 100 hours of battery life, can easily be taken from boat to boat, and offers customizable displays to show what you want to see on the water. Join the many sailors who have made the switch: try the Atlas 2 today!

ATLAS 2

VISIBLE

Configure displays to meet your needs. The A2 is visible through polarized glasses and has an anti-glare coating.

ACCURATE

The most accurate GPS on a sailboat. Measure positional accuracy in centimeters and trust the Atlas 2.

VERSATILE

Add sensors to display speed, water temperature, wind data, load, and more. Or, use the device stand-alone.
